

## NEW, IMPROVED AQUATIC HERBICIDE LIST

"The list went from nineteen-pages to one and a half," said Wes Smith, BPC registrar, of the newly amended list of aquatic herbicides that are regulated at the point of sale. The new, shorter list includes only products registered in Maine and that have an aquatic use printed on the container's label.

What hasn't changed is the basis of the regulation (Chapter 41, Section 4). Only restricted use pesticide dealers can sell aquatic herbicides to licensed pesticide applicators. Advise customers wishing to buy aquatic herbicides to control weeds at waterfronts that they will need a DEP permit and a licensed commercial applicator.

Hydrilla

## FINES

The Pesticide Board voted to seek fines from stores that fail to:

- ✗ renew their General Use Pesticide Dealer's License prior to offering pesticides for sale
- ✗ place the Board required sign where pesticides are displayed
- ✗ protect outdoor display pesticides with a roof and secure them with a fence

## DIAZINON

Residential uses of diazinon insecticide are being phased out to reduce risk to children.

- ✗ Diazinon products labeled for indoor use have been illegal to sell since January 1, 2003. If you still have some on hand, they may be (1) returned to your distributor, (2) disposed of as a hazardous waste through a licensed disposal company, or (3) given away to licensed commercial applicators or (4) used by store owners/managers/employees on their private property. Sale is illegal, but use of already purchased diazinon according to label directions is allowed.
- ✗ Diazinon labeled solely for outdoor use may be sold until December 31, 2004.

## CHLORPYRIFOS

Home use products of the insecticide chlorpyrifos have been illegal to sell since January 1, 2002 (look for Home Pest Control, Lawn Insect Control, Dursban and other products with chlorpyrifos as an active ingredient), except for limited-exposure products such as ant and roach cups. If you still have some on hand you may treat it the same as indoor-use diazinon (see above).

## 10' RULE

This rule has been amended to give more flexibility on where you display pesticides. You may now have pesticides within 10' of food or animal feed product if they are "stored in adjoining isles separated by a solid barrier."

## PESTICIDE DISPLAY AREA SIGN: SAME REQUIREMENTS, NEW LOOK

- ✗ Pesticides on display, unless exempted products (see inset), must be located in a separate area and posted with a Board approved sign designating it as a sales area and informing the public where to get more information.
- ✗ All pesticide containers must be in good condition with the full label intact. Containers cannot be torn, punctured, rusted or leaking.
- ✗ Pesticides, unless exempted products (see inset), cannot be displayed within 10 feet of food or animal feed unless they are stored in adjoining aisles separated by a solid barrier.
- ✗ All outdoor pesticide displays must be securely fenced and have a roof to protect from rain and other weather.
- ✗ All pesticide retailers or wholesalers must be equipped with spill cleanup materials sufficient enough to absorb two times the volume of the largest container on display.

### EXEMPT PRODUCTS:

indoor use products of less than 3% active ingredient, pet supplies, disinfectants, repellents, moth balls, aquarium supplies, pool supplies, aerosols and paints, stains and wood preservatives

## STORAGE & HANDLING TIPS

- ✗ Place a kickboard or a display carton around pallet displays to protect bags and prevent damage from carts.
- ✗ Assign employees to check display areas regularly. Spills of dry pesticides are common at retail facilities and create hazards for both employees and customers. Employees should check for damaged packages and clean up spills quickly and dispose of them properly.
- ✗ It's unlawful to sell pesticides in damaged containers. Bags of dry pesticides tear easily, so retailers must have procedures for handling them. All of the package directions must be legible. Small tears can be repaired using clear tape that doesn't conceal any of the product directions.
